CONSULTATION**

The Digital SAT's structure and scoring system will require careful attention to detail from students. This course will equip students with the fundamental skills and test-taking strategies needed to tackle the new adaptive format. Students will cover the key concepts tested and focus on additional vocabulary acquisition beyond class hours. Moreover, students will learn SAT-specific strategies and identify traps that the testmakers like to place. Progress will be monitored through in-class drills, homework assignments, and a final mock test. By the end of the course, students will know exactly what to expect on the exam and how to perform to the best of their abilities.

Moreover, as the college application process can be quite complex, you may be wondering where standardized testing fits in. It is understandable to have questions such as "Do I need to take the SAT if most colleges are still test-optional?" and "What score should I be aiming for?" To find these answers, contact us to schedule a free mock test assessment and consultation.
