Debating the End of the World (And How to Stop It)

This program is designed for intermediate debaters ready to tackle civilization-scale questions about technology, security, and humanity's future. Students will grapple with our most consequential dilemmas - from artificial intelligence and nuclear weapons to climate intervention and pandemic preparedness - while developing frameworks for analyzing unprecedented problems and irreversible decisions. In every lesson, students will debate cutting-edge issues in global governance and emerging technology, and instructors will work closely with them on problem framing, mechanism analysis, and comparative impact evaluation. Students interested in joining this intensive program must be enrolled in our intermediate debate courses.

In this course, students will...

- Master framing techniques for defining complex problems, characterizing actors, evaluating solutions, and adjudicating difficult trade-offs
- Craft sophisticated arguments engaging with uncertainty, long time horizons, and competing values.
- Develop strategic thinking about humanity's greatest challenges through debating transformative technologies and global risks
